

INVESTIGATION OF EXTREME OPPORTUNITIES OF STAND SUPPORTING SYSTEMS

©2009 V. N. Samsonov, M. S. Kozyreva, A. A. Cherevan

Samara State Aerospace University

The work deals with the forming of the structure of testing complex for working out vibration strength of heavy objects due to the conditions and the level of dynamic correlation of its elements.

Vibration testing, auxiliary stand equipment, dynamic model, correlative dynamic impact, dynamic performance

Samsonov Vladimir Nikolaevich, doctor of technical science, professor of basics of machine design Samara State Aerospace University department. Phone: 8-927-203-77-70. E-mail: samsonov@ssau.ru. Area of research: research and development of complex dynamic systems.

Kozyreva Mariya Sergeevna, student of Samara State Aerospace University. Phone: 8-927-744-32-42. Area of research: research and development of complex dynamic systems.

Cherevan Aleksandor Aleksandrovich, postgraduate of Samara State Aerospace University. Phone: (846) 267-46-10. Area of research: research and development of complex dynamic systems.
