¹Samara State Aerospace University

²Samara State Academy of Railways

Designs of systems internal and external vibrating isolation manual machines of rotary and shock action are considered. Designs of systems vibrating isolation and the modernized samples of the manual tool are resulted. Results of their tests under production conditions.

Vibrating protection, machines grinding, hammers for pasting, support for pasting

Vyakin Veniamin Nikolajevich, Candidate of Engineering Science, Deputy Vice Rector for research and innovation of Samara State Aerospace University. Phone: (846) 267-43-11. Area of Research: protection against vibrations of hand guided tool.

Izranova Galina Vladimirovna, postgraduate, engineer-programmer of Samara State Academy of Railways. Phone: (846) 299-54-02. Area of research: protection against vibrations of hand guided tool.

Lukanenko Vladimir Grigorjevich, Doctor of Engineering Science, Professor of Samara State Academy of Railways. Phone: (846) 241-76-42. Area of research: protection against vibrations of hand guided tool.
