

DISK HARMONIC FINITE ELEMENT

© 2009 D. P. Davydov, A. I. Ermakov

Samara State Aerospace University

The disk harmonic finite element was developed. FORTRAN code program was developed for modal analysis of rotating nonuniform heated disks from the gas turbine engines. Natural frequencies of disks were explored.

Harmonic finite element, disk, matrix, natural frequency, complex form, force, displacement

Davydov Danila Petrovich, assistant of Aerospace Engines Design Department of Samara State Aerospace University. Phone: (846) 267-46-83. E-mail: davydov-ssau@yandex.ru. Area of research: dynamics and strength of gas turbine engines.

Ermakov Alexander Ivanovich, Doctor of Engineering Science, professor of Aerospace Engines Design Department of Samara State Aerospace University. Phone: (846) 334-79-22. E-mail: fdla@ssau.ru. Area of research: dynamics and strength of gas turbine engines.
