

FIRING TEST STAND PULSE DETONATION LOW-THRUST ENGINES

© 2009 G. S. Govorenkho, D. P. Teterin, D. S. Kotelnikhov, A. V. Aliluev, S. V. Aliluev, V. N. Fedorets

«Electropribor» Design Bureau, Saratov

In the article experience of creation a test stand of pulse detonation engines is stated. Stand operating modes, representation and information machining, order of conducting fire tests are presented structure and functions of the test stand, possibility used technical and software.

A model sample, test stand, a thrust, thrust specific impulse, a diffuser, an ejector, a initiator

Govorenko German Semenovich, Doctor of Technical Science, The first assistant to the executive director on a science, the professor «Electropribor» Design Bureau. E-mail: tdp@kbep.ru. Area of research: reliability and quality of systems of flying machines.

Teterin Dmitrii Pavlovich, Candidate of Technical Science, The main designer «Electropribor» Design Bureau. E-mail: tdp@kbep.ru. Area of scientific interests: the automated monitoring systems.

Kotelnikhov Denis Sergeevich, The engineer-designer of «Electropribor» Design Bureau. E-mail: kds@kbep.ru. Area of research: circuitry.

Aliluev Alexei Vasilievich, The engineer-designer of «Electropribor» Design Bureau. E-mail: ali_ale_86@mail.ru. Area of research: mathematical modelling, control systems of power-plants of flying machines.

Aliluev Sergei Vasilievich, The younger scientific employee «Electropribor» Design Bureau. E-mail: ali_ale_86@mail.ru. Area of research: tests of power-plants of flying machines.

Fedorets Vitalii Nicolaevich, Candidate of Technical Science, The chief of laboratory «Electropribor» Design Bureau. E-mail: fvn.spb@mail.ru. Area of research: Detonation engines, burning fuel, a design of power-plants, synthesis of difficult technical systems, arms and the military technics.
