

# FEATURES OF THE NEW GAS TURBINE AVIATION ENGINES THEORY COURSE

© 2009 B. G. Mingazov, V. A. Kosterin, V. L. Varsegov

Kazan State Technical University

Some features of the new gas turbine aviation engines theory course published by professor Kulagin V.V. are described.

*Aviation engines, theory course, theory, calculations, design*

**Mingazov Bilal Galavtdinovich**, Doctor of Technical Science, professor of Kazan State Technical University chair of engines and power-plants theory. Phone: (843) 238-44-20. E-mail: [ming@adeu.kstu-kai.ru](mailto:ming@adeu.kstu-kai.ru). Area of research: in-flow fuel combustion problems, combustion chamber working process simulation.

**Kosterin Valentin Aleksandrovich**, Doctor of Technical Science, professor of Kazan State Technical University chair of engines and power-plants theory. E-mail: [ming@adeu.kstu-kai.ru](mailto:ming@adeu.kstu-kai.ru). Area of research: in-flow fuel combustion problems.

**Varsegov Vladislav Lvovich**, Candadat of Technical Science, associate professor of Kazan State Technical University chair of engines and power-plants theory. E-mail: [ming@adeu.kstu-kai.ru](mailto:ming@adeu.kstu-kai.ru). Area of research: combustion chamber working process simulation.
