Samara State Aerospace University

Essential elements of programming the process of machining parts of the knee-type milling machine, 6M13GN-1, with the help of numerical control machine-tool FMS-3000. There are various programme examples for different parts formation, in particular, the programme of one definite part machining with the help of end millind cutter.

Programme, control, machine, tool, detail, coding, interpolation, correction

Volkov Alexander Nikolaevitch, Candidate in Engineering Science, associate professor of Materials Machining Department of Samara State Aerospace University. Phone: (846) 267-45-74. E – mail: fdla@ssau.ru. Area of research: machining of materials.

Sazonov Michael Borisovitch, Candidate in Engineering Science, associate professor of Materials Machining Department of Samara State Aerospace University. Phone: (846) 267-45-74. E – mail: fdla@ssau.ru. Area of research: machining of materials.

Smolin Vladimir Dmitrievitch, Candidate in Engineering Science, associate professor of Materials Machining Department of Samara State Aerospace University. Phone: (846) 267-45-74. E – mail: fdla@ssau.ru. Area of research: machining of materials.

Tchigrinyev Ilya Alexandrovitch, engineer of Materials Machining Department of Samara State Aerospace University. Phone: (846) 267-45-74. E – mail: fdla@ssau.ru. Area of research: machining of materials.
