

MODELING OF STRUCTURE OF THE POROUS MR MATERIAL IN PROCESS OF HEAT CONDUCTION

© 2009 A. M. Zhizhkin

Samara state aerospace university

Principles of modeling of structure of MR material and heat conduction process for absence of convection of media in holes are presented in this article.

Model, structure, material MR

Zhizhkin Aleksandr Mihailovich, Candidate of Engineering Science, lecturer of Aircraft Engine Design Department of Samara State Aerospace University. Phone: 267-46-87. Area of research: sealing made of MR material.
