«Progress» Design Bureau

In this paper, executed with participation of doctor of engineering sciences, professor of Biryuka Vladimir Vasil'evicha, there are experimental research data of wet condition in fuel tanks of high weight booster rockets for providing corrosion protection during storage and aviation transportation periods.

Fuel tanks of the high weight booster rockets, corrosion, corrosion protection, aviation transportation, humidity content, pressure charging, drying of humid air

Bronshtein Vitalii Mihailovich, candidate of technical science, group director of «Progress» Design Bureau, Samara. Phone: (846) 228-96-49. E-mail: Teplotex_ssau@bk.ru. Area of research: teplomassoobmen, thermodynamics.

Krasnochub Evgenii Karpovich, doctor of engineering science, docent, scientific consultant of «Progress» Design Bureau, Samara. Phone: (846) 228-91-52. Area of research: teplomassoobmen, thermodynamics.

Markin Aleksander Aleksandrovich, doctor of engineering science, deputy chief designer of «Progress» Design Bureau, Samara. Phone: (846) 228-52-65. Area of research: teplomassoobmen, thermodynamics.
