

# THE ALGORITHM OF VIBRATION-BASED DIAGNOSTIC KINEMATIC COMPONENT

© 2009 F. N. Shalaev, V. G. Stogney

Voroneg State Technical University

In the article the author expounds the algorithm of vibration-based diagnostics kinematic component. As to the rotor rotation harmonics the algorithm makes it possible to diagnose the rotor condition and dynamic loading with high probability of precise diagnosis.

*Diagnostic, kinematic component, rotor, dynamic*

**Shalaev Frederick Nikolaevich**, candidate of science, associate professor of Rocket engines division of Voroneg State Technical University. E-mail: [drk135@rambler.ru](mailto:drk135@rambler.ru). Area of research: vibration-based diagnostics.

**Stogney Vladimir Grigorievich**, candidate of science, professor, decan of air department of Voroneg State Technical University. Phone: (4732) 52-53-54. Area of research: power installation performance optimization.
