

# THE SIMPLIFICATION OF HEAT ENGINES THERMODYNAMICS CALCULATION WITH USING OF IDAEAL GAS' MODEL

© 2009 S. A. Gulina, M. Y. Orlov

Samara State Aerospace University

The analysis of possibility of application of model of ideal gases is executed for the calculations of thermodynamics of heat-engines.

*Heat-engine, products of combustion of fuel, molecular-kinetic theory of gases, model of Van-der-vaal'sa, heat capacity*

**Gulina Svetlana Anatol'evna**, senior teacher, Ural State Technical University, Ekaterinburg, aspirant of department thermotechnics and heat engines of Samara state aerospace university. Phone: (846) 335-18-12. E-mail: [Teplotex\\_ssau@bk.ru](mailto:Teplotex_ssau@bk.ru). Area of research: thermodynamics.

**Orlov Michail Yr'evich**, candidate of technical science, the senior lecturer of department thermotechnics and heat engines of Samara state aerospace university. Phone: (846) 335-18-12. E-mail: [Teplotex\\_ssau@bk.ru](mailto:Teplotex_ssau@bk.ru). Area of research: thermodynamics.
