

DEVELOPMENT OF THE DESIGN PROCEDURE OF THE SHAPING RIGGING WITH THE USE OF THE INTEGRATED INFORMATION SYSTEMS

© 2009 T. S. Shishkina, V. G. Smelov, N. D. Pronichev

Samara State Aerospace University

The paper describes the use of integrated CAD system for creating complex of Technology for snap-through-manufacturing organizations. Aanalysis of the effectiveness of the procedure developed in the actual production and gives recommendations for more effective application.

Integrated CAD system, mold form, mold base, controlling program, procedure

Shishkina Tatiana Sergeevna, student of Samara State Aerospace University. E-mail: shi8989@yandex.ru. Area of research: CAD/CAM system.

Smelov Vitaliy Gennadievich, candidate of technical science, associate professor of aircraft engine production department of Samara State Aerospace University. Phone: (846) 267-47-76. E-mail: Pdla_smelov@mail.ru. Area of research: electrochemical processing, PDM systems.

Pronicev Nikolay Dmitrievich, doctor of technical science, professor of aircraft engine production department of Samara State Aerospace University. Phone: (846) 267-45-79. E-mail: Pdla@ssau.ru. Area of research: electrochemical processing, work flows automation, corporate information systems.
