Samara state aerospace university

In work is described experimental acknowledgement of adequacy of the developed mathematical model of instant giving of the liquid.

Mathematical model, gear pump, fluid supply, oscillation damper

Rodionov Leonid Valeryevich, Candidate of Engineering Science, Lecturer of Department “Automatic systems of power plant” of Samara State Aerospace University. E-mail: rl63@bk.ru. Area of research: hydrodynamics and vibroacoustic.

Belov Gleb Olegovich, postgraduate student of Department “Automatic systems of power plant” of Samara State Aerospace University. E-mail: glebbelov@mail.ru. Area of research: hydrodynamics and vibroacoustic.

Budko Mihail Vladimirovich, student of Samara State Aerospace University. E-mail: aseu@ssau.ru. Area of research: hydrodynamics of gear pump.

Kruchkov Alexander Nikolaevich, doctor of the technical science, professor of Department “Automatic systems of power plant” of Samara State Aerospace University. E-mail: kan@ssau.ru. Area of research: calculation and designing of correcting devices for pneumo- and hydrosystems, vibroacoustic.

Shakhmatov Evgeniy Vladimirovich, doctor of the technical science, professor, pro-rector of science and innovation of Samara State Aerospace University. E-mail: shakhm@ssau.ru. Area of research: dynamics of hydraulic and pneumatic systems, vibroacoustic of machine.
