

FEATURES OF APPLICATION OF “ALUMINUM- BORON NITRIDE” COMPOSITE MATERIAL IN AVIATION ENGINES

© 2009 A. A. Zhivushkin, E. A. Kozlova, I. A. Chubukov, A. Yu. Marova

JSC Klimov, Saint-Petersburg

Features of application of aluminum casting composite on the basis of “Al-BN” system have been considered in this work. As a result of the studies practical recommendations on its application in aviation engine designs of Klimov JSC have been provided.

Composite, vacuum compression impregnation, solid lubrication

Zhivushkin Aleksey Alekseevich, Leading specialist of Klimov JSC. 11 Kantemirovskaya, Saint-Petersburg, 194100. Phone (812) 301-90-50. E-mail: klimov@klimov.ru. Area of research: material science.

Kozlova Elena Anatolievna, Head of chemical laboratory of Klimov JSC. 11 Kantemirovskaya, Saint-Petersburg, 194100. Phone (812) 295-42-94, ext. 139. E-mail: klimov@klimov.ru. Area of research: analytical chemistry.

Chubukov Igor Aleksandrovich, Leading engineer of Klimov JSC. 11 Kantemirovskaya, Saint-Petersburg, 194100. Phone (812) 295-42-94, ext. 139. E-mail: klimov@klimov.ru. Area of research: metallurgical technology.

Marova Anastasiya Urievna, Engineer of I rang of Klimov JSC. 11 Kantemirovskaya, Saint-Petersburg, 194100. Phone (812) 295-42-94, ext. 139. E-mail: klimov@klimov.ru. Area of research: metallurgical research of materials.
