

# FEATURES OF ADAPTATION OF FIRST-YEAR STUDENTS OF SSAU IN THE APPLICATION OF COMPUTER TECHNOLOGIES OF TRAINING

©2009 A. I. Belousov, A. G. Maslova

Samara State Aerospace University

The main problems of adaptation of the first-year students, concerning its definition and versions, problems, factors and estimation of level of adaptability under conditions of innovative high school by the example of geometric graph-training using computer technology are analyzed.

*Adaptation, first-year students, social adaptation, professional adaptation, graph-geometrical training, pedagogical system, assimilation, accommodation, synergetic, cognitive activity, sensory period, the adept, optant*

**Belousov Anatoly Ivanovich**, Doctor of Technical Sciences, professor of Samara State Aerospace University. Phone (846) 267-46-75. E-mail: aib15@rambler.ru. Area of Research: aviation and rocket engine-, dynamics, reliability and durability of mechanical systems, hydrodynamic and structural damping; hydrodynamics of porous materials, hydrostatic bearing, theory and methods of vocational education.

**Maslova Anna Grigoryevna**, Chief Deputy of Management of educational work department of Samara State Aerospace University. Phone (846) 267-48-68. E-mail: am082@yandex.ru. Area of Research: theory and methods of professional education, sociology.
