

APPROXIMATE METHODS OF CALCULATING OPTIMAL FLIGHTS OF SPACE VEHICLES WITH LOW-THRUST ENGINES. PART II.

© 2008 V. V. Salmin, V. V. Vassiliev, S. A. Ishkov, V. A. Romanenko,
V. O. Sokolov, O. L. Starinova, V. V. Yurin

Samara State Aerospace University

The second part of the article presents the results of solving some applied problems of flights of space vehicles with low-thrust engines.

Space vehicle, low thrust, optimal control, approximate methods, geocentric manoeuvres, relative motion, interplanetary flights.
