

IDENTIFICATION AND PROCEDURE OF REDUCING PERIODIC NOISE OF INTERNAL COMBUSTION CAR ENGINES USING THE ACTIVE COMPENSATION METHOD

©2009 A. V. Vasilyev, S. S. Andreyev, I. V. Butsayev, V. V. Pimkin

Togliatti State University

Problems of using systems of active compensation of noise in internal combustion car engines are discussed. The procedure and the results of internal combustion engine noise spectrum analysis are given.

Internal combustion car engine, noise, reduction, method, active compensation.
