

COMPUTER SIMULATION OF THIN-WALLED TUBE SINK DRAWING

©2009 V. R. Kargin, B. V. Kargin, T. S. Pastushenko, Ya. A. Yerisov

Samara State Aerospace University

The paper presents the results of computer simulation of the process of thin-walled tube sink drawing into conic dies using the finite element method in a specialized software complex DEFORM-2D.

Mathematical modeling, stress-strained state, thin-walled tubes, sink drawing, force, drawing coefficient, finite element method.
