¹Samara State Aerospace University

²State Research and Production Space Rocket Center «TsSKB-Progress»

The process of ice formation on walls of cryogenic tanks of space rockets is observed, built the computational model of an ice formation from the water which has fallen on a cold wall of a tank.

Cryogenic tank, launchers, start, preparation, rain, education ice, pilotstudy

Biryuk Vladimir Vasiljevich, Doctor of Engineering Science, professor, of the Heat Engineering department of the Samara State Aerospace University. Phone: (846) 335-18-12. E-mail: teplotex_ssau@bk.ru Area of research: teplomassoobmen, thermodynamics.

Shepelev Aleksei Ivanovich, deputy head of the State Research and Production Space Rocket Center «TsSKB-Progress» department, postgraduate. E-mail – uran_74@mail.ru. Area of research: teplomassoobmen, thermodynamics.
