

# A MODEL OF MOTION OF MONODISPERSIBLE GAS-LIQUID STREAM IS IN TRANSZVUKOVOY OF PART OF ROCKET CHAMBER

© 2008 S. V. Epishchenko, A. N. Pervishin

Samara State Aerospace University

The model of calculation of time and high-speed parameters of movement monodisperse gas-liquid and stream in the accelerating block of the rocket chamber is offered.

*Model, fine aerosol, stream, rocket, chamber, drop, range*

**Pervyshin Alexander Nikolaevich**, Doctor of Engineering Science, professor, Head of “Materials Mechanical Working” department of Samara State Aerospace University. Phone number: (846) 267-45-73. Area of research: dynamics of multiphase gas flows.

**Epishchenko Sergey Vladimirovich**, postgraduate “Materials Mechanical Working” department of Samara State Aerospace University. Phone number: (846) 267-45-73, E-mail: [epishchenko@mail.ru](mailto:epishchenko@mail.ru). Area of research: dynamics of multiphase gas flows.
